

POSTDOCTORAL POSITION IN METABOLMICS

David Wishart Research Group

The Wishart Laboratory (www.wishartlab.com; www.metabolomicscentre.ca) invites applications for a postdoctoral fellowship position to work on various research projects in metabolomics at the University of Alberta, in Alberta, Canada.

The position will use a variety of equipment (LC-MS, GC-MS, HPLC and/or NMR) to perform metabolomic analysis for a large number of different projects. The position will also be responsible for the development of new methods for performing routine identification and quantification of compounds in a variety of sample types.

The ideal candidate will have recently completed a Ph.D. in analytical chemistry with a strong history of original research publications, and will have experience in using LC-MS, GC-MS, HPLC and/or NMR.
